TCA 'Blended Mobility within the Context of Digital Pedagogy' (10-12.12.2025) – Themes

Themes:

1. Blended Mobility in the Context of Digital Pedagogy

   Explore the concept and practice of blended mobility within Secondary Education (SE) and Vocational Education and Training (VET).

   Investigate its role in supporting and enriching digital pedagogy, especially as education adapts to an increasingly digital and AI-driven landscape.

2. AI's Influence on Mobility and Pedagogy

   Examine how AI tools and systems are shaping new opportunities and challenges for blended mobility.

   Consider the possibilities of integrating AI in both physical and virtual learning mobility.

3. Methodological Integration in SE and VET

   Share best practices and strategies for using blended mobility methodically to enhance teaching and learning.

   Highlight how blended mobility can serve as a bridge between theoretical knowledge and practical, cross-cultural collaboration.

4. Blended Mobility within Erasmus+

   Define what constitutes blended mobility under the Erasmus+ programme for SE and VET.

   Clarify eligibility, structure, and intended outcomes as outlined by Erasmus+ guidelines.

5. Experiences from the Field

   Present good practices and testimonials from schools that have already implemented blended mobility activities.

   Brainstorm ideas for blended mobility practices at participants' home institutions.

6. Barriers and Opportunities

   Discuss why some schools participating in Erasmus+ are not yet carrying out blended mobility.

   Identify potential barriers (logistical, financial, digital literacy, etc.) and discuss support mechanisms to enable broader adoption.

The event will be held:
- Dec 10 - starting around lunch time
- Dec 11 - full day of work and activities
- Dec 12 - ending with lunch
